The Bee Suite

PAYMENT REVENUE STRATEGY

Make money from payment operations, not by saying “we take tuition volume.”

Package the fee as infrastructure: online payment workflow, payout routing, reconciliation, receipts, failed payment handling, ledger updates, and support.

Recommended language

Payment Operations Fee

This sounds like a service layer, not a tuition skim.

1

Monthly Payments Add-On

$99-$299

Per location per month for payment infrastructure and reconciliation.

2

Successful Payment Fee

$0.50-$0.95

Flat fee per successful payment. Simple, defensible, and scales with usage.

3

Parent Convenience Fee

Optional

Card fee or service fee can be parent-paid after legal/card-network review.

4

Recovery & Add-On Fees

$2-$15

Failed-payment recovery, registration deposits, expedited payouts, and premium workflows.

The Bee Suite

MONEY FLOW

Clean payment flow: parents pay, school receives tuition, Bee Suite retains the platform/service fee.

Parent

$1,000 tuition invoice

Parent pays through the portal. Optional service/convenience fee can be shown separately.

Parent-facing wording matters: “online payment service fee” is clearer than “tuition surcharge.”

→

Stripe Checkout + Connect

Routes funds automatically

Stripe handles card/ACH processing, hosted checkout, receipts, and Connect payout routing.

The Bee Suite app uses application fees to retain the configured platform fee.

→

School + Bee Suite

Tuition to school, fee to platform

School ledger is credited for tuition. Bee Suite captures the payment operations economics.

Refunds, failed payments, disputes, and expired checkouts are tracked by webhook events.

School-paid model

School pays SaaS + payment operations. Parent checkout stays clean.

Parent-paid model

Parent pays convenience/card fee where allowed. Requires disclosure review.

Hybrid model

Brand pays SaaS, locations use payment tools, parent fees are optional by payment type.

The Bee Suite

KID CITY SCENARIO

Payment operations can create upside without pitching a percentage of tuition.

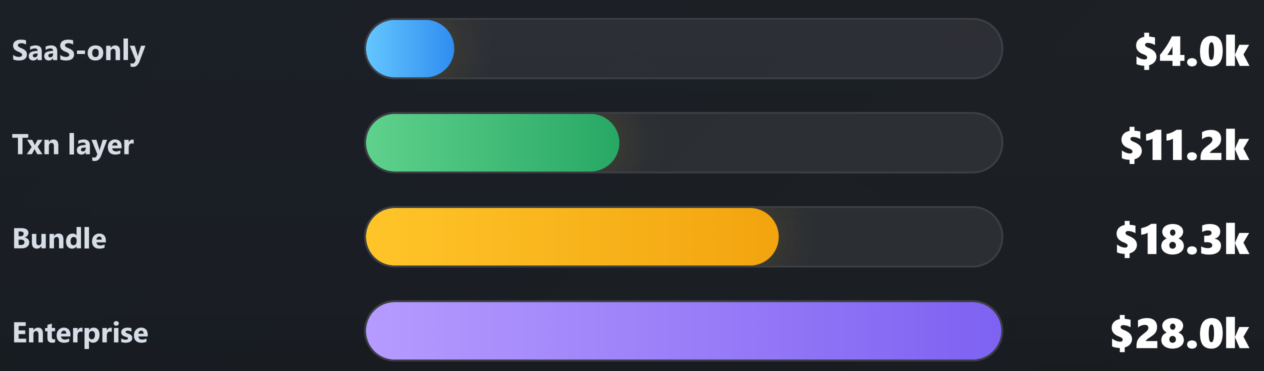
Illustrative assumption: 96 locations and 100 successful parent payments per location per month.

MODEL	PRICING STRUCTURE	MONTHLY REVENUE	ANNUALIZED
SaaS-only parity Matches current software baseline	$4,000 brand fee	**$4,000**	$48,000
Transaction layer No per-location add-on	$4,000 + $0.75/payment	**$11,200**	$134,400
Payments bundle Best launch position	$4,000 + $99/location + $0.50/payment	**$18,304**	$219,648
Enterprise payments Post-pilot full suite	$6,500 + $149/location + $0.75/payment	**$28,004**	$336,048

These are pricing scenarios, not final quotes. Swap the payment count, locations, and fee levels to model low/base/high cases.

Monthly revenue comparison

Relative to the $4,000/month software-only baseline.



Strategic point

The upside is in owning payment operations, not just replacing the old software bill.

The Bee Suite

RECOMMENDATION

Launch with a clean pilot offer, then graduate to a payments bundle once schools use billing live.

Phase 1 · Kid City Pilot

$4,000/month brand fee

Include payments during pilot. Keep parent surcharge off. Validate onboarding, reconciliation, and support load.

Phase 2 · Payments Bundle

$99/location + $0.50/payment

Position as online payment operations. Include portal pay, ledger sync, receipts, refunds, and reporting.

Phase 3 · Enterprise Payments

$149/location + $0.75/payment

Add recovery, auto-pay optimization, registration/deposit flows, payout options, and payment analytics.

Decision checklist for the team

- ✓ Use the phrase **Payment Operations Fee** or **Online Payment Platform Fee**.
- ✓ Keep Stripe card/ACH processing separate from Bee Suite service fees in proposals.
- ✓ Do not enable parent card surcharges until disclosure, debit-card handling, and state/card-network rules are reviewed.
- ✓ Make ACH the preferred payment method to reduce friction and improve center margins.
- ✓ Report value monthly: successful payments, failed-payment recoveries, auto-pay adoption, days-to-collect, and reconciliation time saved.
- ✓ After 60-90 days of payment data, renegotiate from pilot pricing to the bundle.

Recommended meeting ask: approve the pilot offer now, approve the post-pilot payments bundle as the default conversion path, and defer parent surcharge decisions until compliance review.
