The BEE Suite School System Operating Manual

Last updated: October 19, 2026

Audience: owners, executives, school directors, billing admins, training leads, and launch support.

Purpose

> CURRENT GUIDE Confirm the correct school and an approved feature before following these steps.

This manual breaks down the key functions a school needs in order to use The BEE Suite as its operating system. It also points each user type to the SOP or step-by-step guide written for their role.

For a school entering from ProCare, directors must complete `DIRECTOR_PROCARE_DATA_CLEAN_START_GUIDE.md` before data readiness can be approved. Data readiness remains separate from access, invitations, kiosk, attendance, billing, payments, messaging, and cutover.

The BEE Suite supports school operations, but it does not replace professional judgment for legal, licensing, medical, custody, payment, payroll, tax, or accounting decisions. Sensitive records must stay role-scoped and human-reviewed.

Current Application Navigation

The live application uses a permission-scoped sidebar plus tabbed consolidated workspaces. A user sees only the groups and tabs allowed for that role and school scope.

Sidebar workspace	Current tabs or primary views
School Operations	Enrollment status, Classrooms, Attendance, Daily reports, Incidents
Families & Communication	Families, Children, Messages, Media review
Staff & Access	Teachers, Team permissions

Sidebar workspace	Current tabs or primary views
Billing & Payments	Billing & invoices, Payments
Records & Compliance	Forms, Documents, Compliance
Enrollment CRM	Leads, Pipeline, Tours, Waitlist
Campaigns & Automations	Campaigns, Automations
Insights & Reputation	Enrollment status, Analytics, Reputation
Settings & Setup	Settings, Integrations, School setup, Notifications, White-label

Role entry points are `https://thebeesuite.io/directors`, `https://thebeesuite.io/teachers`, `https://thebeesuite.io/parents`, and `https://thebeesuite.io/executives`. General sign-in remains available at `https://thebeesuite.io/login`.

August 2026 Workflow Rules

- Directors can add a family, guardian, child, billing account, and kiosk PIN in one save from `Add Family, Parent + Child`.
- Parent invitations are sent one guardian at a time from `Parent Portal Access`. Current internal family linkage and identity checks authorize access; a ProCare import batch is not required for a safely entered new enrollment.
- Ambiguous or conflicting guardian identities fail closed. Never create a duplicate family or child to work around missing parent visibility.
- Parent invitation states distinguish provider acceptance from confirmed delivery and support a manual school-email fallback when automated sending fails.
- Active lists, counts, and receivables exclude withdrawn/historical families while retaining their records for past-record review.
- The selected child's tuition assignment is the canonical future rate; the family view displays active per-child rates and the weekly total.
- Weekly and four-week tuition cadences are supported where configured. Existing billed coverage must be reviewed before changing cadence.
- Eligible unpaid invoices may be voided through the approved action. Payment and ledger history must never be deleted.
- The school absorbs Stripe processing costs; no processing fee is added to a parent payment.
- AI data changes require an authorized, school-scoped preview and explicit confirmation.
- Full dashboards do not automatically refresh in the background; lightweight notification refreshes remain. Users must wait for action results and reopen the specific record when confirmation is needed.

System Map

Key Functions Schools Need

Function area	What it does	Primary users	SOP or guide
School setup	Creates brand, center, classrooms, launch settings, payout owner, and setup checklist	Executive, director	`SCHOOL_SYSTEM_OPERATING_MANUAL.md`, `EXECUTIVE_ADMIN_SOP.md`, `DIRECTOR_SOP.md`

Function area	What it does	Primary users	SOP or guide
Users and permissions	Creates role-scoped access for executives, directors, teachers, billing staff, parents, authorized pickups, and auditors	Executive, director	`EXECUTIVE_ADMIN_SOP.md`, `DIRECTOR_SOP.md`
Enrollment CRM	Handles inquiries, lead routing, tours, pipeline stages, waitlist, registration, notes, tasks, and follow-up	Director, executive	`DIRECTOR_SOP.md`, `EXECUTIVE_ADMIN_SOP.md`
Family records	Stores guardians, children, authorized pickups, emergency contacts, custody notes, medical notes, allergies, schedules, classroom links, and the visible family/child/billing context used while editing	Director, assistant director	`DIRECTOR_SOP.md`
Classroom operations	Supports rosters, attendance, daily reports, media upload, incident creation, ratio warnings, and offline queue behavior	Teacher, director	`TEACHER_SOP.md`, `DIRECTOR_SOP.md`
Lobby kiosk	Lets verified guardians check children in/out by PIN or QR; lets staff clock in/out by staff code	Director, guardian, staff	`KIOSK_AND_AUTHORIZED_PICKUP_GUIDE.md`
Parent portal	Gives parents access to their own family dashboard, child updates, messages, photos, documents, invoices, payment options, and preferences	Parent, guardian	`PARENT_PORTAL_SOP.md`, `PARENT_PORTAL_INSTALL_GUIDE.md`
Billing and invoices	Manages billing accounts, canonical child-level weekly tuition assignments, family weekly totals, invoice creation, products/fees, subsidy notes, ledger, payments, dunning, and reconciliation	Billing admin, director	`BILLING_ADMIN_SOP.md`, `PARENT_ACH_PAYMENT_GUIDE.md`
Payout readiness	Connects each school to the correct Stripe payout account before parent payments are enabled	Executive, billing admin	`EXECUTIVE_ADMIN_SOP.md`, `BILLING_ADMIN_SOP.md`

Function area	What it does	Primary users	SOP or guide
Documents and forms	Requests, uploads, reviews, signs, approves, rejects, and tracks expirations for family, child, staff, and compliance records	Director, parent, staff	`DIRECTOR_SOP.md`, `PARENT_PORTAL_SOP.md`
Incidents and media	Supports teacher submission, director review, parent acknowledgement, media permission review, and audit trail	Teacher, director, parent	`TEACHER_SOP.md`, `DIRECTOR_SOP.md`, `PARENT_PORTAL_SOP.md`
Communications	Handles messages, announcements, campaign drafts, templates, attachments, notification preferences, and delivery logs	Director, teacher, billing admin, parent	Role SOPs
FTE and analytics	Gives weekly FTE submission, executive review, missing school tracking, dashboards, trends, and exports	Director, executive	`EXECUTIVE_ADMIN_SOP.md`, `DIRECTOR_SOP.md`
Integrations	Connects payments, email, SMS, calendar, lead ads, signatures, storage, AI, and webhooks when approved	Executive, platform admin	`EXECUTIVE_ADMIN_SOP.md`
AI and audit logs	Provides labeled suggestions and audit evidence; never makes final sensitive decisions	All roles	Role SOPs

Minimum Setup For A School

Complete these items before using The BEE Suite as the daily system:

1. Confirm the school/center record, address, phone, timezone, director, operating hours, and classroom list.
2. Confirm each classroom age group, capacity, ratio rule, schedule, and teacher assignment.
3. Import or manually enter families, children, guardians, emergency contacts, pickup permissions, custody notes, allergies, medical notes, and media permissions.
4. Create director, assistant director, teacher, billing/admin, executive, and support users with the least access they need.
5. Confirm parent guardian emails and family links before sending parent portal access.
6. Set or confirm kiosk PINs and QR credentials before lobby check-in goes live.
7. Create tuition plans inside the correct school, assign the correct weekly rate to each child, and validate family totals, fees, discounts, subsidy/copay rules, ledger balances, and open invoices.
8. Complete Stripe connected payout onboarding for the correct school before accepting parent payments.

9. Approve payment disclosures, ACH/card policy, refund process, dispute process, and support owner.
10. Test login, dashboard, family record, attendance, daily report, incident, parent portal, billing, document, and kiosk flows using approved test records.

Go-Live Sequence

Role Handoff

User type	What they need first	Primary daily workflow	Sendable guide
Executive or owner	Multi-location access, admin permissions, launch checklist, payout readiness	Review dashboards, selected-period FTE, school setup, integrations, access, and audit logs	`EXECUTIVE_ADMIN_SOP.md`
Director or assistant director	Correct school access, families, classrooms, teacher accounts, billing readiness	Run school dashboard, CRM, family records, parent access, classroom oversight, documents, messages, and escalations	`DIRECTOR_SOP.md`
Billing admin	Billing access, ledgers, school-scoped tuition plans, payment readiness, approved policy	Create invoices, manage payment methods, send secure setup links, run school-scoped Terminal payments, reconcile payments, handle failed payments	`BILLING_ADMIN_SOP.md`
Teacher	Teacher login, classroom assignment, roster, shift code if used	Attendance, daily reports, photos, incidents, messages, offline sync	`TEACHER_SOP.md`
Parent or guardian	Guardian email linked to family, approved invitation setup completed, current password, secure parent portal link	Install portal, view updates, message school, review documents, choose card/bank payment, acknowledge incidents	`PARENT_PORTAL_INSTALL_GUIDE.md`, `PARENT_ACH_PAYMENT_GUIDE.md`, `PARENT_PORTAL_SOP.md`
Authorized pickup	Active PIN or QR credential, pickup authorization, correct school kiosk	Check child in/out, confirm pickup by credential or signature, contact director for warnings	`KIOSK_AND_AUTHORIZED_PICKUP_GUIDE.md`

Launch Week Command Rhythm

Use this daily rhythm during the first week:

1. Morning director check: login, school scope, attendance, ratios, kiosk status, teacher roster, unresolved issues.
2. Midday classroom check: attendance accuracy, daily report progress, media review queue, offline queue warnings.
3. Afternoon family check: parent portal issues, messages, documents, pickup changes, billing questions.
4. End-of-day closeout: attendance complete, reports finished, incidents reviewed, payments checked, support issues logged.
5. Executive review: FTE, cross-location blockers, access changes, payout/payment readiness, audit concerns.

For family and billing work, staff should always confirm the visible school, family, child, guardian, and billing context before saving. Weekly tuition should be changed only through the selected child's billing assignment; family, child, enrollment, and billing views display that shared value.

Live Payment Gate

Do not ask parents to pay online until:

- The school's Stripe connected payout account is ready.
- Webhook reconciliation is configured and tested.
- Debit or credit card and bank account options match approved school policy and show the exact total before submission.
- The school-absorbed Stripe processing-cost policy is confirmed and no parent processing surcharge is configured.
- Refunds, disputes, failed payments, duplicate payment handling, and support ownership are documented.
- A billing smoke test passes for the school.

Software deployment readiness does not open this gate. Billing, live payments, invitations, communications, kiosk, ProCare import/cutover, and school rollout require separate named-school approvals.

Sensitive Data Rules

- Stop if the wrong school, family, child, classroom, invoice, document, or incident is visible.
- Do not train parents or teachers using screenshots that show another family's data.
- Do not share custody, medical, billing, incident, or staff records outside the authorized role.
- Do not use AI output as the final decision for safety, medical, legal, custody, billing, licensing, or compliance issues.
- Log privacy, payment, wrong-scope, and live-operations issues immediately.

Visual Assets

Use these visuals in training decks and printed packets:

Figure: Weekly tuition assignment and Thursday billing flow

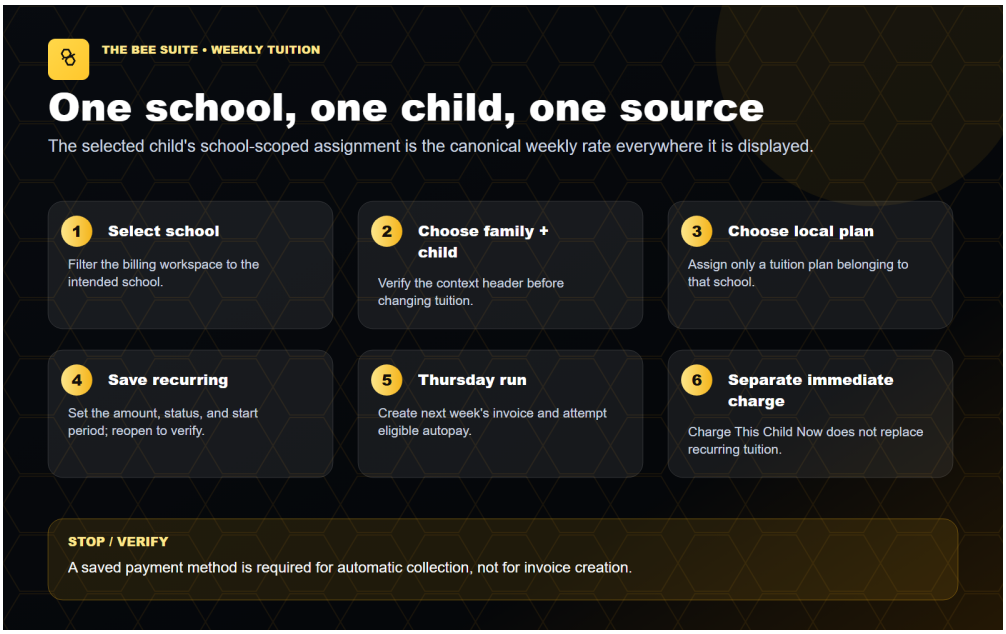

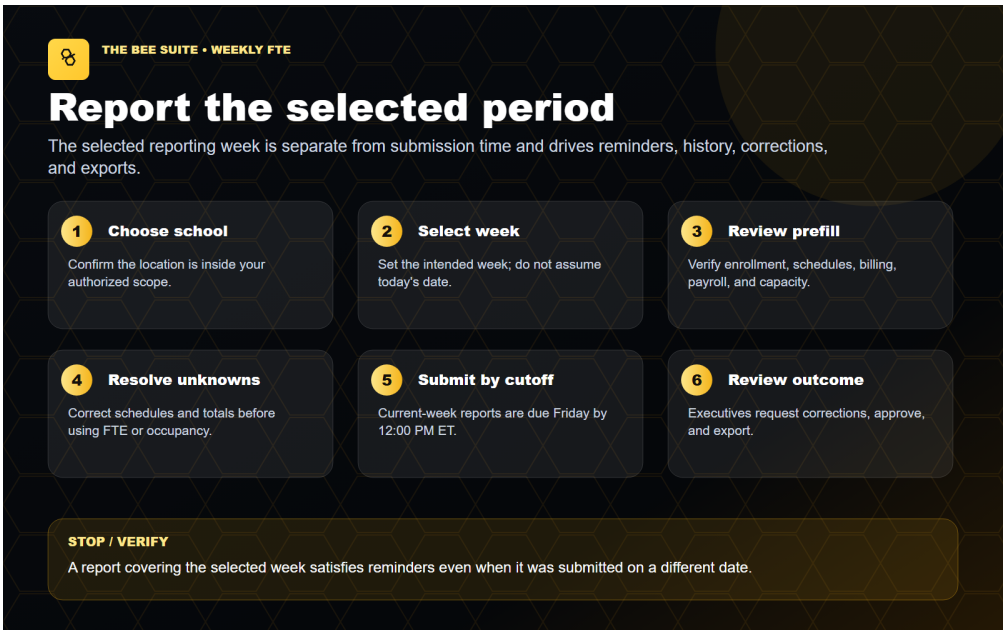

Figure: Selected-period weekly FTE flow

Support Escalation Packet

Every escalation should include:

- School name.
- User name, email, and role.
- Page or workflow.
- Family, child, classroom, invoice, document, or incident involved.
- Exact action attempted.
- Expected result.
- Actual result.
- Screenshot if safe to share.
- Time of issue.
- Whether live operations are blocked.

Use urgent escalation for login outages, wrong-school visibility, missing children, custody conflicts, payment failures, privacy exposure, incorrect document/incident visibility, or kiosk check-in failures.
