The BEE Suite App Completion Checklist

Last updated: June 25, 2026

Status legend:

- ☒ Built, deployed, or foundation-complete enough to use or test now.
- ☐ Still needs work before it should be considered complete production coverage.

Current Rollout Focus

- ☐ Complete final Kokomo live-use punch list and regression smoke before wider school rollout.
- ☐ Package the rest-of-schools implementation plan for end-of-week readiness, including rollout order, data import validation, director training, and support coverage.
- ☐ Confirm first rollout wave order, launch owner, escalation contact, cutover window, and stop conditions for each school.
- ☐ Create dedicated production smoke-test credentials and at least one linked parent/guardian test account for each rollout role before final role smoke.
- ☒ Kokomo has used The BEE Suite live this week, giving the team real school traffic to find and fix remaining issues before broader rollout.

Current Production Baseline

- ☐ Complete a fresh production smoke test for every role after each major deployment.
- ☒ Next.js App Router SaaS app deployed on Vercel.
- ☒ Production domain connected at `thebeesuite.io`.
- ☒ GitHub main branch deployment flow active.
- ☒ Supabase/PostgreSQL production database connected.

- ✓ Prisma schema covers the core childcare operating model.
- ✓ Kid City USA pilot tenant, centers, users, leads, FTE, and core CRM workflows are live.
- ✓ Role-based UI and data scoping exists for executive users vs location/director users.
- ✓ Location-level users are scoped to assigned center data for CRM leads and FTE reports.
- ✓ The app name and author metadata have been corrected to The BEE Suite and BrunerDigital.
- ✓ Production Prisma connection usage is limited to reduce Supabase connection exhaustion during live school traffic.
- ✓ Create a formal release checklist before every live-school rollout.

Public Website And Landing Page

- ☐ Add final production copy pass for public SaaS launch.
- ☐ Add full testimonials section with real approved customer quotes.
- ☐ Add generated or real in-school product usage imagery.
- ☐ Add conversion tracking, analytics, and ad pixels when marketing launches.
- ✓ Public landing page exists.
- ✓ Landing page is positioned for childcare centers and preschool operators broadly, not only Kid City USA.
- ✓ Hero visual style has been upgraded toward the dark, premium BEE Suite direction.
- ✓ Sections include platform explanation, operational value, and feature previews.
- ✓ Pricing/payment revenue visual materials exist in docs.
- ✓ Social/media marketing asset package exists in docs.
- ✓ Add final responsive QA across common mobile/tablet/desktop sizes.

Authentication And Account Access

- ☐ Add MFA option for executive/admin users.
- ☐ Add full user invite email workflow for staff/executive accounts instead of only admin-created accounts.
- ✓ Login page exists.
- ✓ Forgot password/reset password routes exist.
- ✓ Supabase Auth integration exists.
- ✓ Session cookie auth exists.
- ✓ Login rate limiting guard exists.
- ✓ Kid City USA location users can log in with assigned school accounts.

- ✓ Executive users including brenden@kidcityusa.com , marie@kidcityusa.com , audrey@kidcityusa.com , and kayleen@kidcityusa.com were added previously.
- ✓ Password reset support exists through the UI/API.
- ✓ Complete forced password reset workflow for first production login.
- ✓ Add session revocation/admin logout-all-devices control.
- ✓ Add device session tracking, heartbeat, app-mode labels, and scoped device-session revocation controls.
- ✓ Add parent portal invitation/password setup workflow for linked guardians.
- ✓ Add automatic Bee Suite teacher login generation for new teacher/staff profiles.
- ✓ Add PWA install prompt and service-worker registration guidance for tablet, parent, teacher, and admin app access.

Multi-Tenant, Franchise, And White-Label Architecture

- ☐ Add actual logo/favicon upload storage and preview flows.
- ☐ Add custom domain DNS validation, activation, and deployment binding.
- ☐ Add separate approval/grant flow if support impersonation is ever enabled.
- ☐ Add complete owner-group management views for franchisees who own multiple locations inside a larger brand.
- ✓ Schema includes tenants, brands, organizations, owner groups, centers, classrooms, users, access grants, brand assets, and brand customizations.
- ✓ Supports single-location, multi-location, franchise, owner-group, and corporate-level separation.
- ✓ White-label settings module exists.
- ✓ Brand/center customization data model exists.
- ✓ Executive admin console can manage location/user structures at a high level.
- ✓ Access grant model exists for broader than one-center access.
- ✓ Add tenant controls UI for branding fields, parent portal labels, legal/footer settings, asset references, feature flags, DNS verification requests, and support-access audit requests.
- ✓ Add tenant-level feature flags in the UI.
- ✓ Add self-service custom domain DNS verification request UI with generated TXT record values.

Executive Admin

- ☐ Add granular permission editor for roles beyond the current role/access-grant model.
- ☐ Add support-access approval/grant workflow if support impersonation is ever enabled.
- ✓ Agency/franchise/executive admin page exists.

- ✓ Executive admin API exists.
- ✓ Corporate users can create/archive locations and manage users through UI foundations.
- ✓ Access grant replacement guardrails exist.
- ✓ Audit logs exist for sensitive actions.
- ✓ Complete all executive CRUD flows with confirmation states, validation, and error recovery.
- ✓ Add bulk user/location import for executive admins.
- ✓ Add password reset email trigger from executive admin, not just password set/reset foundations.
- ✓ Add support-access request workflow with explicit audit warnings.

Dashboards

- ☐ Replace remaining demo-login classroom/parent fallbacks with real imported school data.
- ✓ Main dashboard page exists.
- ✓ Director school setup command center exists for full-feature launch configuration.
- ✓ Multi-location dashboard exists.
- ✓ Center dashboard exists.
- ✓ Classroom dashboard exists.
- ✓ Teacher portal/mobile view exists.
- ✓ Parent portal view exists.
- ✓ Executive-level Kid City USA views can show CRM/FTE/reporting data.
- ✓ Demo-login-only data exists for classroom and parent engagement sections.
- ✓ Add configurable dashboard widgets per role.
- ✓ Add saved filters and date ranges.
- ✓ Add export/share actions for dashboard snapshots.

CRM Leads And Enrollment Pipeline

- ✓ CRM leads page exists.
- ✓ CRM API supports scoped lead list/create.
- ✓ Lead detail API supports fetch/update.
- ✓ Lead notes/tasks/messages/tours APIs exist.
- ✓ Pipeline stages are defined.

- ✓ Lead stage update bug was fixed so saving lead info no longer reverts to New Inquiry.
- ✓ Location-level lead visibility is scoped to the correct center.
- ✓ Inquiry form leads route correctly to the selected Kid City USA location ID.
- ✓ Lead routing audit API exists.
- ✓ Manual lead entry exists for directors/location users.
- ✓ Mr. Bee AI assistant API exists for lead communication help.
- ✓ Build full drag-and-drop pipeline board interaction.
- ✓ Add duplicate lead detection/merge workflow.
- ✓ Add full communication timeline per family/lead.
- ✓ Add CRM saved views, filters, and exports.
- ✓ Add lead assignment/owner workflow.
- ✓ Add automated nurture steps tied to stage transitions.

Inquiry Forms And External Lead Intake

- ✓ Public inquiry API exists.
- ✓ Kid City USA inquiry form embed code exists.
- ✓ Kid City USA location dropdown maps selected location ID to the correct CRM center.
- ✓ Inquiry notifications send to global recipients and location-specific recipients.
- ✓ Google Sheets backup webhook support exists.
- ✓ Public Kid City locations API exists.
- ✓ Inquiry allowed-origin configuration exists.
- ✓ Add self-service inquiry form builder for every new tenant/location during onboarding.
- ✓ Add executive dashboard button to copy embed code for each location/brand.
- ✓ Add CAPTCHA/bot protection to public inquiry endpoint.
- ✓ Add UTM/source capture and reporting across all embeds.
- ✓ Add retry queue for failed email/Google Sheet/CRM forwarding.

Family, Guardian, And Child Profiles

- ✓ Family profile page exists.
- ✓ Child profile page exists.

- ✓ Family/student intake component exists.
- ✓ Family intake API links children to family accounts.
- ✓ Guardian PIN management exists.
- ✓ Schema covers guardians, children, authorized pickups, emergency contacts, medical notes, allergies, documents, billing accounts, enrollments, and sibling relationships.
- ✓ Sensitive medical/custody/document fields are modeled separately.
- ✓ Complete full edit forms for family, guardian, child, pickup, emergency contact, allergy, medical note, and family/child document fields.
- ✓ Add custody visibility controls and staff-facing warnings across family, child, teacher, kiosk, and document review surfaces.
- ✓ Add document request/upload/review/expiration workflow per family/child with parent portal submission and director review actions.
- ✓ Add guardian self-service change request approval workflow with restricted request notes, director review, parent notification, and audit trail.
- ✓ Add family merge/deduplication with same-school duplicate scoring and guarded merge action.

Enrollment, Waitlist, Tours, And Online Registration

- ✓ Enrollment pipeline page exists.
- ✓ Waitlist page exists.
- ✓ Tours page exists.
- ✓ Tour API exists through lead tour route.
- ✓ Online registration page and API exist.
- ✓ Enrollment/application schema exists.
- ✓ Forms and form submission schema exists.
- ✓ Complete online registration packet using the Kid City USA operational registration field map.
- ✓ Add parent-facing registration account creation/invite flow from approved registration applications.
- ✓ Add enrollment checklist per child/family after application approval.
- ✓ Add document/signature collection for registration forms through requested uploads and internal signature requests.
- ✓ Add application approval/rejection workflow with director notes, audit trail, CRM stage updates, and parent notification.
- ✓ Add registration fee/deposit collection once payments are finalized.

FTE Reporting

- ☐ Add final Google Sheet two-way reconciliation rules.

- ✓ FTE report schema and migration exist.
- ✓ Director FTE submission form exists.
- ✓ Executive FTE review/correction/approval exists.
- ✓ Current-week missing report tracker exists.
- ✓ CSV export exists.
- ✓ Executive bulk FTE CSV import/correction exists.
- ✓ FTE trend visuals and school snapshots exist.
- ✓ FTE notification dropdown escalation exists.
- ✓ Vercel cron route exists for persistent missing-FTE notifications.
- ✓ `CRON_SECRET` is configured in Vercel production.
- ✓ Google Sheet backup/snapshot structure exists.
- ✓ Confirm the final reporting week cutoff/due time with Kid City USA operations: Friday by 12:00 PM ET.
- ✓ Add full historical FTE trend filters by region/state/owner group.
- ✓ Add executive manual edit table for inline corrections.
- ✓ Add email/SMS reminders for missing FTE reports at Friday 8:00 AM ET and Friday 5:00 PM ET.

ProCare Import And Cutover

- ☐ Run final import mapping against real exports from each live Kid City USA location.
- ☐ Confirm every ProCare field used by the schools is mapped or intentionally excluded.
- ✓ ProCare import page/panel exists.
- ✓ ProCare import API exists.
- ✓ Import supports unencrypted ProCare CSV exports.
- ✓ Schema includes ProCare import batch/row tracking.
- ✓ ProCare field coverage documentation exists.
- ✓ Import can populate families, guardians, children, classrooms, staff, invoices, balances, and attendance/check log foundations.
- ✓ ProCare staff import creates generated teacher logins and center-scoped teacher access for new staff.
- ✓ Add import preview/diff UI before committing records.
- ✓ Add rollback/export backup for imports.
- ✓ Add duplicate matching controls for families/children/guardians.
- ✓ Add final migration runbook for switching each location off ProCare.

Attendance, Check-In, And Kiosk

- ✓ Attendance page exists.
- ✓ Check-in page exists.
- ✓ Center-specific check-in page exists.
- ✓ Kiosk lookup/check APIs exist.
- ✓ Guardian 4-digit PIN model/hash support exists.
- ✓ Director PIN setting API exists.
- ✓ Attendance/check logs schema exists.
- ✓ Kiosk guardrails exist for PIN security and attendance state.
- ✓ Complete lobby tablet UX with idle/reset mode and large touch targets.
- ✓ Add signature capture.
- ✓ Add QR/PIN options.
- ✓ Add parent-facing kiosk PIN reset and QR card display.
- ✓ Add director QR card display for guardian kiosk credentials.
- ✓ Add late pickup flag workflow.
- ✓ Add staff kiosk mode.
- ✓ Add parent authorization warnings during pickup.
- ✓ Add end-of-day attendance reconciliation report.

Classroom Operations And Teacher Workflows

- ✓ Classroom dashboard exists.
- ✓ Teacher portal/mobile view exists.
- ✓ Teacher attendance API exists.
- ✓ Teacher daily report API exists.
- ✓ Teacher incident API exists.
- ✓ Teacher media upload API exists.
- ✓ Daily reports, meals, naps, diaper/potty logs, activities, incidents, and child media schema exists.
- ✓ Supabase child media storage/signing support exists.
- ✓ Complete teacher mobile task-entry workflow for all daily report fields.
- ✓ Add classroom roster attendance board with fast check-in/check-out states.

- ☒ Add batch logging for meals/naps/diapers/activities.
- ☒ Add classroom ratio warnings and staff assignment actions.
- ☒ Add offline/poor-connectivity strategy for classroom tablets.
- ☒ Add partial teacher daily report and incident save support so incomplete classroom entries can be finished later.
- ☒ Add teacher permissions separated from director/location users.

Parent Engagement Portal

- ☐ Add push notifications/native app strategy.
- ☒ Parent portal page exists.
- ☒ Parent portal workspace component exists.
- ☒ Parent contact request API exists.
- ☒ Parent incident acknowledgement API exists.
- ☒ Parent media review API exists.
- ☒ Parent media/photo review flow foundation exists.
- ☒ Parent-facing daily report/media/account schema exists.
- ☒ Complete parent account invitation/login flow for linked guardians.
- ☒ Add parent dashboard for real balances, daily reports, photos, documents, announcements, and messages.
- ☒ Add parent notification preferences.
- ☒ Add parent document submission/review workflow foundation.
- ☒ Add parent emergency contact/update request submission and director review queue foundation.

Billing, Ledger, Tuition, And Payments

- ☐ Validate terminal store live pricing, fulfillment owner, shipping/tax handling, and support handoff before allowing real hardware orders.
- ☐ Confirm tuition reminder cadence, copy, opt-out behavior, and drop-off reminder expectations with Kokomo before enabling at all schools.
- ☒ Billing/invoices page exists.
- ☒ Payments page exists.
- ☒ Billing settings page exists.
- ☒ Stripe Connect onboarding/status/refresh routes exist.
- ☒ Stripe checkout route exists.

- ✓ Stripe webhook route exists.
- ✓ Billing guardrails and idempotency tests exist.
- ✓ Schema covers billing accounts, invoices, invoice items, payments, ledger entries, products, tuition plans, and subscription placeholders.
- ✓ Payment fee strategy has been defined: ACH recovery cap, card processing recovery, BEE Suite monthly/payment operations fees, and Kid City USA pilot waiver.
- ✓ Complete parent tuition payment UI in parent portal.
- ✓ Complete school payout onboarding UI for Stripe Connect.
- ✓ Finalize payment processing recovery disclosure packet and code-level legal/accounting approval gate.
- ✓ Add real invoice generation/recurring tuition scheduler with assignment controls, daily cron route, and dashboard coverage metrics.
- ✓ Add payment method management with Stripe setup sessions, billing portal handoff, autopay status, and admin visibility.
- ✓ Add secure branded payment method request forms and expiring family-specific setup links.
- ✓ Add connected-account Stripe customer and payment-method setup flows scoped to each school's Stripe account.
- ✓ Add tuition payment reminder settings, invoice-ready notices, and past-due drop-off reminders.
- ✓ Add failed payment/retry workflow with Stripe failure capture, scheduled dunning, retry state, and billing follow-up visibility.
- ✓ Add ledger reconciliation reports comparing billing account balances to latest ledger balances.
- ✓ Add subsidy/agency payment tracking.
- ✓ Add terminal store checkout for Stripe readers/accessories with Bee Suite markup tracking.
- ✓ Add Kid City software invoice generation for active school user billing.

Messaging, Communication, And AI Assistant

- ☐ Validate daily report email delivery, sender authentication, and guardian recipient settings with real family emails before wider rollout.
- ✓ Messages page exists.
- ✓ Communications API exists.
- ✓ Lead message API exists.
- ✓ Announcement page exists.
- ✓ Campaign page exists.
- ✓ Mr. Bee AI route exists.
- ✓ Message, announcement, campaign, AI summary, and AI suggestion schema exists.
- ✓ SendGrid and Twilio env/integration placeholders exist.
- ✓ Complete two-way parent/director/teacher messaging UI.

- ✓ Add real SendGrid email send paths for all communication workflows.
- ✓ Add real Twilio SMS send/receive paths.
- ✓ Add message templates and merge fields.
- ✓ Add broadcast segmentation by classroom, center, status, and tag.
- ✓ Add daily report email delivery on child checkout with guardian recipient settings and delivery attempt logging.
- ✓ Add AI reply suggestions directly inside message composer.
- ✓ Add human-review guardrails for sensitive AI outputs in UI.

Forms, Documents, And E-Signature

- ✓ Forms page exists.
- ✓ Documents page exists.
- ✓ Registration form API exists.
- ✓ Signature request mock integration API exists.
- ✓ Document/form/form submission schema exists.
- ✓ Build actual form builder UI.
- ✓ Complete required document checklist per family/staff/child.
- ✓ Add file upload UI tied to Supabase storage for parent submissions and director/staff document records.
- ✓ Add expiration reminders and document review states.
- ✓ Integrate real e-signature provider or build internal signature capture.
- ✓ Add export package for licensing/records requests.

Compliance And Incident Reporting

- ✓ Compliance-readiness dashboard exists.
- ✓ Incident reports page exists.
- ✓ Teacher incident creation API exists.
- ✓ Parent incident acknowledgement API exists.
- ✓ Staff certification, background check placeholder, medical/allergy, document, and incident schema exists.
- ✓ Language avoids guaranteed legal/licensing compliance.
- ✓ Add state-specific licensing configuration.
- ✓ Add emergency drill logs UI.

- ✓ Add medication log workflow.
- ✓ Add compliance report export.
- ✓ Add incident admin review workflow with parent acknowledgement status.
- ✓ Add compliance task assignment/reminders.

Staff, Teachers, Scheduling, And Ratios

- ☐ Validate staff compensation, payroll IDs, pay codes, overtime rules, and printable time cards with Kokomo before using reports for payroll decisions.
- ☐ Confirm payroll provider/export handoff format before calling payroll integration complete.
- ✓ Teachers/staff page exists.
- ✓ Staff profile, schedule, certification schema exists.
- ✓ Staff counts and teacher counts are represented in dashboard/reporting.
- ✓ Separation between location users/directors and classroom staff has been corrected at the data access level.
- ✓ Dedicated director UI exists for adding/editing teacher profiles and certifications.
- ✓ Complete staff CRUD UI with safe teacher deactivation instead of destructive deletion.
- ✓ New teacher profile saves return generated Bee Suite username and temporary password for handoff.
- ✓ Add staff onboarding checklist/request workflow for teacher documents, background checks, training, and certifications.
- ✓ Load school-specific teacher onboarding forms/documents and final requirement labels from each school's staff credential rules.
- ✓ Add background check tracking UI.
- ✓ Add staff time clock.
- ✓ Add staff PIN kiosk clock-in/out with duplicate action guardrails and director time-card edit support.
- ✓ Add PTO/unavailability.
- ✓ Add staff compensation/payroll fields for hourly/salary, pay status, pay codes, department, overtime eligibility, and effective date.
- ✓ Add staff hours reporting and printable payroll time cards.
- ✓ Add ratio engine by age group/state rules.
- ✓ Add staff schedule/calendar views.

Calendar And Scheduling

- ✓ Calendar page exists.

- ✓ Tours, child schedules, billing due dates, compliance reminders, birthdays, and staff schedules are represented in schema/module definitions.
- ✓ Google Calendar mock integration is represented in integrations/readiness.
- ✓ Build full calendar UI with filters by center/classroom/user.
- ✓ Add Google Calendar real sync.
- ✓ Add recurring events/closures/holiday management.
- ✓ Add staff schedule publishing.
- ✓ Add parent event visibility controls.

Marketing, Campaigns, Reputation, And Reviews

- ✓ Campaigns page exists.
- ✓ Automations page exists.
- ✓ Reputation/reviews page exists.
- ✓ Campaign, automation, automation run, review, and survey schema exists.
- ✓ Google Business Profile mock integration exists in structure.
- ✓ Build campaign editor and template library.
- ✓ Add automation workflow builder UI beyond foundation.
- ✓ Add campaign send scheduling and reporting.
- ✓ Add review request workflows.
- ✓ Add survey/NPS collection.
- ✓ Add AI review response generator in UI.

Reporting And Analytics

- ✓ Analytics/reporting page exists.
- ✓ Executive dashboard reports CRM, FTE, occupancy/revenue readiness, and operational snapshots.
- ✓ FTE-specific trend and snapshot visuals exist.
- ✓ Readiness API exists.
- ✓ Add full report builder with filters/date ranges.
- ✓ Add lead source and funnel conversion dashboards.
- ✓ Add attendance/absence trend reporting.

- ✓ Add billing/revenue/AR reporting.
- ✓ Add parent response time and message analytics.
- ✓ Add export to CSV/PDF for key reports.

Notifications

- ☐ Add push/native app delivery channel provider beyond in-app notifications.
- ✓ Notification center page exists.
- ✓ Notification dropdown exists in app shell.
- ✓ Notification summary API exists.
- ✓ Derived alerts include inquiries, high-intent leads, tasks, tours, incidents, and FTE due items.
- ✓ Persistent FTE reminder cron route exists.
- ✓ Add read/unread mutation UI.
- ✓ Add parent notification preferences.
- ✓ Add full notification preferences by role/user beyond parent portal.
- ✓ Add email/SMS delivery channels through SendGrid/Twilio with role/user preference filtering.
- ✓ Add notification dedupe/retention policy.

Integrations

- ✓ Integrations page exists.
- ✓ System readiness API exists.
- ✓ Stripe integration foundation exists.
- ✓ SendGrid integration foundation exists.
- ✓ Twilio integration foundation exists.
- ✓ Google Sheets backup support exists for inquiries and FTE.
- ✓ Supabase storage/auth/database integration exists.
- ✓ Google Calendar/Google Business Profile/Meta/Zapier/webhook/signature/cloud storage placeholders exist.
- ✓ Complete real setup UI for each integration.
- ✓ Add integration health checks and last-sync logs.
- ✓ Add retry queues for failed outbound integrations.
- ✓ Add tenant-specific integration credentials instead of only platform env vars.

Database, Security, Privacy, And Audit

- ☐ Rotate any production/API secrets shared in chat or plain text before expanding beyond Kokomo.
- ☐ Run a formal Supabase advisor/security review after each schema migration.
- ☐ Confirm RLS/table access documentation still matches the current schema after the latest migrations.
- ☐ Run a backup restore drill against a safe environment before the first multi-school cutover wave.
- ☒ Prisma schema covers core modules.
- ☒ Migrations exist for CRM import, kiosk/parent engagement, FTE, tenant access/branding, ProCare metadata, Supabase public API hardening, Stripe hardening, and integration delivery queues.
- ☒ Audit log schema and audit helper exist.
- ☒ Sensitive workflows use server-side role/scope checks.
- ☒ Supabase public API hardening migration exists.
- ☒ Guardrail helper files exist for access grants, attendance, billing, dates, documents, notifications, operations, portal, readiness, kiosk, FTE, and storage.
- ☒ Existing tests cover many guardrails.
- ☒ Add RLS policy documentation for every exposed table.
- ☒ Add encryption-at-rest/field-level encryption plan for medical/custody/payment-sensitive fields.
- ☒ Add data retention/deletion policy.
- ☒ Add audit log viewer filters and export.
- ☒ Add backup/restore runbook.

Testing And Quality Assurance

- ☐ Add staging environment separate from production.
- ☐ Add seed/test fixtures for every major role.
- ☐ Add error monitoring and uptime monitoring.
- ☐ Run `npm run pilot:check` against production data after each rollout setup pass.
- ☒ Typecheck script exists.
- ☒ Lint script exists.
- ☒ Build script exists.
- ☒ Node test suite exists.
- ☒ Guardrail tests cover several critical flows.
- ☒ Playwright/browser checks have been used manually for important UI.

- ✓ Add automated Playwright smoke tests for login, CRM, inquiry, FTE, kiosk, parent portal, and billing.
- ✓ Add pilot readiness check script for environment, database, live data, guardian PINs, classrooms, invoices, incidents, and media review queues.
- ✓ Add CI workflow that blocks deploys on typecheck/lint/test/build failure.

Documentation And Operations

- ☐ Update stale product notes/roadmap docs so shipped features are no longer labeled as placeholders.
- ☐ Create dedicated teacher classroom quick-start and billing/admin quick-start guides from the paper training packet.
- ✓ Architecture docs exist.
- ✓ Product docs exist.
- ✓ Deployment/go-live docs exist.
- ✓ Inquiry intake docs exist.
- ✓ Kid City CRM cutover docs exist.
- ✓ Kiosk/parent engagement docs exist.
- ✓ FTE reporting docs exist.
- ✓ Stripe Connect docs exist.
- ✓ ProCare field coverage docs exist.
- ✓ Pricing/payment visuals exist.
- ✓ In-school testing runbook exists.
- ✓ Consolidate docs into one operator-facing launch handbook.
- ✓ Create school director quick-start guide.
- ✓ Create executive/admin quick-start guide.
- ✓ Create parent onboarding guide once parent portal is production-ready.
- ✓ Create incident response/support escalation guide.
- ✓ Generate low-ink paper training packet with role setup sheets, SOP handouts, source graphics, preview screenshots, manifest, and PDF output.

User-Facing Route Checklist

- ✓ / public landing page.
- ✓ /app installable app/PWA entry.
- ✓ /login .

✓ /reset-password .

✓ /onboarding .

✓ /school-setup .

✓ /dashboard .

✓ /multi-location-dashboard .

✓ /center-dashboard .

✓ /fte-reports .

✓ /classroom-dashboard .

✓ /crm-leads .

✓ /family-detail .

✓ /child-profile .

✓ /enrollment-pipeline .

✓ /waitlist .

✓ /tours .

✓ /calendar .

✓ /messages .

✓ /announcements .

✓ /campaigns .

✓ /automations .

✓ /parent-media-review .

✓ /incident-reports .

✓ /staff .

✓ /billing-invoices .

✓ /payments .

✓ /compliance .

✓ /reputation .

✓ /analytics .

- ✓ `/ai-command` .
- ✓ `/parent-portal` .
- ✓ `/parent-portal/setup` .
- ✓ `/payment-method-form/[token]` .
- ✓ `/teacher-portal` .
- ✓ `/agency-admin` .
- ✓ `/white-label` .
- ✓ `/team-permissions` .
- ✓ `/integrations` .
- ✓ `/billing-settings` .
- ✓ `/notifications` .
- ✓ `/audit-logs` .
- ✓ `/help` .
- ✓ `/check-in` .
- ✓ `/check-in/[centerId]` .
- ✓ `/registration` .
- ✓ Replace module-placeholder behavior with full CRUD workflows on every lower-priority operations page.

API Route Checklist

- ☐ Add rate limiting to all public and sensitive mutation routes.
- ✓ Auth: login, logout, forgot password, reset password.
- ✓ Admin: executive management.
- ✓ AI: Mr. Bee assistant.
- ✓ Billing: checkout session, Stripe webhook, Stripe Connect onboard/refresh/status, invoices, autopay, payment-method setup, payment-method requests, payment reminders, tuition assignments, corporate software invoices, and terminal store checkout.
- ✓ Communications: messages.
- ✓ Compliance: emergency drills, licensing, medication logs, tasks, task updates, and compliance export.
- ✓ Cron: FTE reminders, tuition billing, tuition payment reminders, autopay invoices, payment dunning, document expirations, integration retries, and campaign scheduling.
- ✓ Dashboard/settings/setup: widgets, dashboard options, school setup, setup checklist, tenant controls, and device sessions.
- ✓ Documents: checklist, upload, review, request email, parent submission, and export package.

- ✓ Families: family/student intake.
- ✓ FTE: list/export, submit/update, bulk import/correction.
- ✓ Guardians: PIN management.
- ✓ Health/readiness.
- ✓ Imports: ProCare.
- ✓ Inquiries: public inquiry intake and routing audit.
- ✓ Integrations: push placeholder, signature requests, SMS placeholder.
- ✓ Kiosk: lookup/check.
- ✓ Leads: list/create/detail/update/messages/notes/tasks/tours.
- ✓ Notifications: summary and read mutation.
- ✓ Onboarding.
- ✓ Operations records.
- ✓ Parent: contact requests, incident acknowledgement, media review, invitations, preferences, kiosk credentials, and document submission.
- ✓ Profile: password update and profile photo upload.
- ✓ Public Kid City locations.
- ✓ Registration.
- ✓ Reports and reputation: report export, review requests, AI review responses, surveys, and survey responses.
- ✓ Teacher: attendance, daily reports, incidents, media.
- ✓ Add API-level automated tests for every route.
- ✓ Add request/response logging with PII-safe redaction.

Highest Priority Remaining Work

- ☐ Complete final Kokomo live-use punch list and regression smoke before wider school rollout.
- ☐ Create dedicated production smoke-test credentials and linked parent/guardian test accounts for every rollout role.
- ☐ Confirm first rollout wave order, launch owners, escalation contacts, cutover windows, and support coverage.
- ☐ Complete full ProCare import validation with real exports from active Kid City USA locations.
- ☐ Replace remaining demo-login fallbacks with real imported classroom/family/teacher data.
- ☐ Update stale product notes/roadmap docs so shipped features are no longer labeled as placeholders.
- ☐ Validate staff payroll/time cards, terminal store ordering, tuition reminders, and daily report emails with Kokomo before enabling them across all schools.

- ✓ Finish parent portal account access, balances, tuition payment UI, daily report details, photo viewing, documents, and messages.
- ✓ Finish teacher classroom tablet workflows for daily logging.
- ✓ Complete kiosk production UX with authorization/signature/late pickup workflows.
- ✓ Complete Stripe Connect payout onboarding and parent tuition checkout end-to-end.
- ✓ Complete inquiry embed self-service generator for every tenant/location.
- ✓ Add automated Playwright smoke tests and CI gate.
- ✓ Add formal production runbook for live school support.
- ✓ Complete legal/privacy/security review before public SaaS launch beyond Kid City USA pilot. Internal review and remediations are complete in `docs/LEGAL_PRIVACY_SECURITY_REVIEW_2026-06-09.md` ; external owner/counsel/vendor sign-offs remain tracked in `docs/OWNER_ACTION_ITEMS.md` .
