

The BEE Suite Team Share Guides

Prepared July 27, 2026 from repository working-tree behavior reviewed the same day. This folder contains refreshed Markdown source copies and matching PDF editions of the core team-facing product, role, onboarding, payment, kiosk, migration, and support guides.

Recommended send order

1. Start with BEE_SUITE_COMPLETE_GUIDE . pdf or SCHOOL_SYSTEM_OPERATING_MANUAL . pdf.
2. Send each person only the SOP for their role.
3. Send parent guides only after family links and invitation readiness are approved.
4. Send payment guidance only after the named school's billing and payment gates are approved.
5. Use the migration email sequence for a controlled school launch; ProCare remains the source of truth until signed cutover.

Important status

This packet documents the current repository behavior; it does not claim that every capability is deployed or approved for every school. Setup, parent invitations, kiosk/PIN, billing, parent payments, ProCare retirement, mobile stores, and wider-wave approval remain independent gates. HELD OFF is not PASS. These guides do not replace a dated school/module GO decision.

Current visuals

The packet embeds nine privacy-safe process diagrams, five screenshot-derived role graphics, and the latest light-mode role screenshots dated July 27, 2026. Warning banners and developer controls are excluded. Teacher guides use iPad and desktop captures, director and executive guides use desktop captures, and parent guides use iPhone, iPad, and desktop captures with iPhone shown most often.

Privacy of bundled visuals

The bundled visuals use seeded demo records and contain no real child, family, employee, billing, or authentication data. Do not replace them with production screenshots unless those screenshots are separately reviewed and approved for the intended audience.
