

Kiosk And Authorized Pickup Guide - The BEE Suite

Last updated: August 11, 2026

Audience: directors, front desk staff, parents, guardians, authorized pickups, and staff using the lobby kiosk.

Purpose

CURRENT GUIDE Confirm the correct school and an approved feature before following these steps.

The lobby kiosk lets verified adults check children in or out and lets staff clock in or out. Family check-in uses a center-specific 4 digit PIN or QR credential. Staff clock-in uses a 4 digit staff kiosk code.

Visual Overview

Figure: Kiosk and authorized pickup flow

Current Kiosk Credential Flow

- The family kiosk is center-specific. Confirm the school name on the lobby device before every test or launch.
- A guardian may use the 4 digit family PIN or issued QR credential. When no PIN exists, the parent invitation/setup flow may initialize it from the last four digits of the guardian phone.
- The parent setup screen allows the guardian to confirm or change the PIN. Directors can manage the PIN and QR credential from the family workspace.
- A credential never overrides custody, pickup, identity, or front-desk verification warnings.
- Wait for the completed confirmation before repeating a check-in, check-out, clock-in, or clock-out action. If the device or network fails, use the school's documented fallback and reconcile the event once.

Director Setup

1. Confirm the child is linked to the correct family and classroom.
2. Confirm every guardian and authorized pickup is current.
3. Confirm custody and pickup notes are reviewed.
4. Set or reset the guardian 4 digit kiosk PIN.
5. Print or share the guardian QR card if the school uses QR check-in.
6. Open the center kiosk route on the lobby device.
7. Confirm the kiosk shows the correct school before families use it.
8. Test one check-in and check-out with an approved test record.

Do not run the lobby kiosk until PIN_HASH_SECRET or the approved production secret is configured.

Do not activate the kiosk merely because setup or training passed. The named school still needs its separate dated kiosk/PIN approval.

Parent Or Authorized Pickup Check-In

1. On the lobby kiosk, choose Family.
2. Choose PIN or QR.
3. If using PIN, enter the 4 digit code from the school.
4. If using PIN, tap Verify Family PIN.
5. If using QR, scan the QR credential from the school; scanning verifies automatically.
6. Confirm the correct family appears.
7. Select the child or children arriving.
8. Tap Check In.
9. Wait for the confirmation message.

Parent Or Authorized Pickup Check-Out

1. On the lobby kiosk, choose Family.
2. Choose PIN or QR.
3. If using PIN, enter the 4 digit code from the school.
4. If using PIN, tap Verify Family PIN.
5. If using QR, scan the QR credential from the school; scanning verifies automatically.
6. Confirm the correct family appears.
7. Select the child or children leaving.
8. Tap Check Out.
9. Wait for the confirmation message.

By tapping check in or check out, the kiosk records PIN or QR credential evidence for the selected children. Staff should verify a separate pickup adult when school policy requires it. The system records credential confirmation separately from any typed or written signature requirement.

Kiosk Warnings

Stop and ask the director or front desk for help if:

- The wrong family appears.
- A child is missing.
- A child appears who should not be connected to you.
- A protected pickup note or front desk verification warning appears.
- The kiosk says the credential could not be verified.
- The child should not be checked out yet.
- The balance/payment reminder does not look right.

Staff Clock-In Or Clock-Out

1. On the kiosk, choose Staff.
2. Enter work email if the kiosk asks for it or if the code is not unique.
3. Enter the 4 digit staff code.
4. Tap Find Staff Clock.
5. Confirm your name, title, classroom, and current clock status.
6. Add an optional shift note if needed.
7. Tap Clock In or Clock Out.
8. Wait for confirmation before leaving the kiosk.

Teachers should not use another staff member's code.

Front Desk Daily Routine

1. Open the kiosk before arrival time.
2. Confirm the correct school and date are shown.
3. Confirm the device is connected to the internet.
4. Confirm the screen auto-resets after use.
5. Watch for protected pickup, late pickup, tuition, or verification warnings.
6. Escalate child, pickup, custody, or wrong-family issues immediately.
7. Close or secure the kiosk at the end of the day.

Security Rules

- Do not write PINs where other families can see them.
- Do not share one guardian's PIN with another adult.
- Reset a PIN if it may have been exposed.
- Do not leave a family result open on the kiosk.
- Use the Start over or reset behavior if a family walks away.
- Treat pickup, custody, and protected notes as sensitive.

Troubleshooting

Contact the director or support owner with:

- School name.
- Guardian or staff name.

- Child name if relevant.
- Kiosk mode: Family or Staff.
- PIN or QR used, but do not send the full PIN in screenshots or messages.
- Action attempted: Find Family, Check In, Check Out, Find Staff Clock, Clock In, or Clock Out.
- Expected result.
- Actual result.
- Time of issue.
- Whether arrival or pickup is blocked.
