

The BEE Suite Team Share Guides

Prepared September 2, 2026. This stable CURRENT folder replaces prior date-stamped packets and contains the canonical Markdown and PDF editions of the core product, role, onboarding, payment, kiosk, migration, and support guides.

Recommended send order

1. Start with BEE_SUITE_COMPLETE_GUIDE . pdf or SCHOOL_SYSTEM_OPERATING_MANUAL . pdf.
2. Directors completing a ProCare transition use DIRECTOR_PROCCARE_DATA_CLEAN_START_GUIDE . pdf after the Fleet Verification Packet reaches READY_FOR_DIRECTOR_REVIEW.
3. Send each person only the SOP for their role.
4. Send parent guides only after family links and invitation readiness are approved.
5. Send payment guidance only after the named school's billing and payment gates are approved.
6. Send AGENCY_SUBSIDY_BILLING_OPERATIONS . pdf before a school records an agency remittance; the named program, claim, and accounting evidence must be ready first.
7. Use the migration email sequence for a controlled school launch; ProCare remains the source of truth until signed cutover.

Important status

Setup, parent invitations, kiosk/PIN, billing, parent payments, ProCare retirement, mobile stores, and wider-wave approval are independent gates. HELD OFF is not PASS. These guides do not replace a dated school/module GO decision.

Current visuals

The packet uses the same deep navy, warm white, and BEE gold system as the current web app. Teacher guides use iPad and desktop screens. Director and executive guides use desktop screens. Parent guides use iPhone, iPad, and desktop screens, with iPhone shown most often.

Privacy of bundled visuals

The bundled visuals use seeded demo records and contain no real child, family, employee, billing, or authentication data. Do not replace them with production screenshots unless those screenshots are separately reviewed and approved for the intended audience.
